SKILLS AND INTEREST

Technical skills: Webdesign, HTML,CSS,JAVASCRIPT, Responsive webdesign

Language: English, Tamil

Interests: Photography, Editing,Programing

PROJECTS

Project-1: Simple Responsive Website (10/24)

Focus: Building a simple yet effective responsive website using HTML, CSS, and JavaScript with an emphasis on media queries for adaptability across various screen sizes.

KEY FEATURES:

Responsive Layout: Utilized CSS media queries to ensure the website adjusts its layout based on screen size, providing an optimized experience for different devices.

Clean and Simple Design: Developed a minimalist design using HTML5 and CSS3 to create a clean, user-friendly interface.

Basic JavaScript Interactivity: Implemented basic JavaScript functionality for features like toggling mobile navigation menus and simple animations.

Mobile-First Approach: Designed the website using a mobile-first approach, ensuring a smooth experience on mobile devices before scaling up for larger screens.

Project-2: E-Commerce Website (06/24)

Focus: A responsive e-commerce website built using HTML, CSS, and JavaScript, designed to provide a seamless shopping experience across all devices.

KEY FEATURES:

Clean and Intuitive User Interface: Features product listings that make it easy for users to browse and find products.

Dynamic Shopping Cart: Allows users to add and remove items smoothly, enhancing the shopping experience.

Simple Checkout Process: Streamlined for user convenience, making the purchase process quick and easy.

Interactive Elements: Utilizes JavaScript for features like image sliders and form validation, providing an engaging and interactive user experience.
